A total of 150 plants have been planted. The forest is very important for maintaining the ecological balance of the environment of the earth. Also, earlier the forest use to cover a major part of the surface of the earth. But, now due to the rapid cut down of forest due to industries, and land for settlement the number of forests has reduced.

Apart from that, the forest grows naturally but in order to increase the speed of reforestation, our contribution is a must for it. Also, it will help the forest to recover from the loss due to deforestation. Furthermore, with our help, the pace of tree plantation can be increased.
