**New Delhi, Dated 18 December, 2013**

**Agenda for the meeting of the Standing Linkage Committee (Long Term) for Power to be held on  
20<sup>th</sup> December, 2013**

A meeting of the Standing Linkage Committee (Long Term) for Power will be held on 20.12.2013 under the chairmanship of Additional Secretary (Coal) to review the status of LoAs issued by Coal India Ltd and its subsidiaries in pursuance of the recommendations of the Committee.

<b>Agenda Item &amp; No.</b>	<b>Brief Description of the Agenda item</b>
<b>Agenda Item No.1:</b>	Confirmation of the minutes of the SLC(LT) review meeting held on 04.10.2013.
<b>Agenda No. 2-(i) Formulation of guidelines for considering requests from Project Developers for change in the name, management structure/ control, etc.</b>	The issue relating to name change was deliberated by the SLC(LT) in its meeting held on 18.04.2011 and certain guidelines were suggested which were approved by the competent authority. Subsequently, some related issues have been raised and therefore the same needs to be further deliberated in the Committee. A detailed discussion paper on the subject is being circulated separately.

<p><b>Agenda No. 2-(ii):</b>  <b>Provision of coal supplies during the period when the decision on request for name change is pending.</b></p>	<p>There have been instances where running units with ongoing coal supplies from CIL subsidiaries have requested for recording change of name, management pattern, etc and the coal supplies have been stopped pending approval of the competent authority for such changes. This brings the running unit to a standstill situation. In a few cases, Ministry had to intervene to continue coal supplies. Therefore, it has been proposed to issue general guidelines to coal companies to ensure that running units are not shutdown during the pendency of their request for change in name or management pattern. The following guidelines have been suggested in this regard:-</p> <ul style="list-style-type: none"> <li>(i) Whenever a consumer having ongoing coal supplies under FSA applies for name change or intimates the change in the equity/management structure or control, the coal supplies should not be discontinued immediately unless there are compelling reasons to believe that the name change requested is not likely to be accepted.</li> <li>(ii) The Coal Company will examine the request and if the case involves any change in the equity/management structure or control requiring the approval of the Ministry, the same will be referred to the Ministry by the company for a decision with the specific comments/recommendations of the coal company.</li> <li>(iii) In the meanwhile, coal supplies under the existing FSA should be continued for a period of three months or till a decision is conveyed by the Ministry whichever is earlier.</li> </ul> <p>SLC(LT) may consider the issue for appropriate recommendations.</p>
<p><b>Agenda No. 3</b>  <b>Miscellaneous Items</b>  (i) Name change issue of M/s</p>	<p>This is regarding a request received from M/s. Athena Chhattisgarh Power Pvt. Limited (ACPL) regarding change of the name of SPV from “Athena Chhattisgarh Power Pvt. Limited (ACPPL) to Athena Chhattisgarh Power Limited” (ACPL). The request of the applicant was examined and the competent authority approved</p>

<p>Athena Chhattisgarh Power Limited</p>	<p>name change of the company, which was communicated to CIL vide MOC letter dated 3<sup>rd</sup> September, 2013. In response to MOC letter, SECL sought clarification as to whether FSA can be signed by them with ACPL as an SPV of Athena Energy Ventures Pvt. Ltd. The matter was placed before the SLC (LT) for Power in its meeting held on 13.09.2013. It was decided as under:-</p> <p style="text-align: center;"><i>“As the relevant documents were to be examined in detail, the Committee deferred the matter. Papers about authorized and subscribed capital before and after name change should be furnished by the developer duly signed by the Company Secretary”.</i></p> <p>The papers in this regard were submitted by the applicant company. Apart from these, some more clarifications were also sought for from the applicant. The applicant explained its position in respect of the query raised by SECL in respect of SPV. The comments of applicant are as under:-</p> <p>Athena Chhattisgarh Power Limited is an SPV formed for construction of 2x600MW Coal based thermal power project, which is the end use project of the erstwhile developer i.e. Green Infrastructure Pvt. Ltd. (GIPL) (now known as Athena Infra Projects Private Limited). ACPPL vide its letter dated 05/09/2007 had informed the Ministry on the formation of SPV. The project is within the 78,000 MW TPPs for which a Presidential Directive has been issued by MoC to CIL for signing of FSA.</p> <p>SLC(LT) may consider the case and make suitable recommendations.</p>
<p><b>Agenda No. 3- Mis. Items</b> (ii) Request for conversion in the category of 8 MW rice husk based biomass plant of M/s Vandana</p>	<p>M/s Vandana Vidhyut Limited has requested for conversion of their 8 MW rice husk based biomass plant located at Bilaspur, Chattisgarh from CPP to IPP. The applicant has stated that their plant is an 8 MW Rice husk based biomass power plant (IPP) whereas MOCs linkage letter shows it in the CPP category. The commercial production of Rice husk based biomass Power plant was commenced on 01.12.2001. Coal linkage allocation application was submitted by applicant in the Ministry for 6 MW (subsequently enhanced to</p>

<p>Vidhyut Limited from CPP to IPP</p>	<p>8 MW) Rice Husk Based Biomass power Plant. The SLC (LT) for Power in its meeting held in 1998 recommended the coal linkage to this biomass power plant in CPP category. In the copy of the linkage application provided by the developer, the power generated was to be consumed by the erstwhile Madhya Pradesh Electricity Board and Private Parties viz. "M/s. Vandana Industries Ltd., Vandana Ispat Ltd. and Vandana Udhyog Ltd." It was not indicated in the applications whether it was for a CPP or IPP. The agreement the company entered into with MPSEB also indicated consumption of power generated towards "Captive Consumption/ sale to third party / sale to MPEB.</p> <p>Applicant has now informed that the entire power generated out of this plant was supplied to the grid vide execution of long term PPA with MPEB in 2000 / CSPDCL in 2003 and continue to be the same, with the existing PPA in 2013 with CSPDCL which is valid upto year 2033. FSA was signed with the SECL.</p> <p>At the time of renewal SECL has asked applicant to submit an affidavit stating the category of the plant. The applicant has stated that this is a Pre-NCDP coal linkage and 8 mw Biomass power plant is in running condition and an environmental friendly project for which linkage allocation was done in the year 2001. Since SECL is not renewing the FSA, they are facing a serious threat of shut down of plant.</p> <p>Since the linkage was granted as CPP, the request for conversion is to be considered by the Committee.</p>
<p><b>Agenda No. 3- Mis. Items</b> (iii) Review of LoA granted to Bokaro Power Supply Company (P) Ltd.</p>	<p>This is regarding a request received from M/s. Bokaro Power Supply Company (P) Ltd regarding revival of LoA for supply of coal to BPSCL for its 75 MW expansion unit (CPP). The developer has stated that LoA was issued for 75 MW CPP of BPSCL, Bokaro Steel City on 02/02/2009. As per terms &amp; conditions of LoA, BPSCL had to submit prescribed milestones for 75 MW whereas BPSCL submitted milestones for 36 MW BPTG &amp; 300 T/hr HP Boiler (which is equivalent to 75 MW power plant) within prescribed time frame. In this regard comments of CCL were sought. CCL informed that the documents submitted by BPSCL are irrelevant</p>

	<p>as LoA has been issued for 75 MW CPP and not for 36 MW BPTG &amp; 300 T/hr high pressure Boiler. A clarification was issued by Central Electricity Authority (CEA) on 31.01.2011 in the matter. CEA has clarified the coal requirement for the steam cum co-generation plant with 1x36 MW back pressure TG set along with 1x300 T/hr High pressure boiler. The steam conditions at the inlet to the turbine are indicated as 300 T/hr at 98 ata and 535°C. The steam at out let of back pressure turbine is indicated to be 297.88 T/hr at 13 ata and 267.48°C thereby generating about 36 MW of Power. The steam taken out of back pressure turbine at 13 ata is to be used as process steam in the steel plant. The coal requirement for the steam cum cogeneration plant will correspond to 300 T/hr boiler equivalent to about 75MW, out of which 36 MW corresponds to power generation &amp; the rest for process steam for the boiler of the Steel Plant.</p> <p>In this regard Ministry of Power has also submitted its comments on 09.09.2011 with a request to advise CCL to revalidate the LoA cancelled by CCL, as the delay in EC may also be considered for condoned has been mainly due to the requirement to conduct fresh EIA study.</p> <p>It is to be decided by SLC (LT) whether milestones for 36 MW may be accepted in this matter instead of 75 MW as suggested by MoP/CEA or not.</p>
<p><b>Agenda No. 3- Mis. Items</b> (iv) Coal linkage to Muzzaffarpur Barauni TPPs</p>	<p>This is regarding additional coal linkage to Muzaffarpur TPS and Barauni TPS.</p> <p>MoP /Govt of Bihar requested for additional coal linkage to Muzaffarpur TPS and Barauni TPS. The proposal was included in the agenda for the SLC(LT) meeting dated 31.05.2013 and the Committee decided to recommend considering grant of LoA on priority to such units;</p> <p>(i) Which are located in states where per capita energy consumption is less than half of the national average;</p> <p>(ii) The unit is wholly owned by the State Government or wholly owned entity of the State Governments,</p>

especially if the quantity of coal involvement is minimal

The Committee decided that in such matters, an appropriate decision will be taken on case to case basis if the above criteria are accepted.

Comments of CIL were called for in the matter. CIL has informed that Muzaffarpur TPS and Barauni TPS had concluded FSAs for the referred units with CIL sources as per allocation of ACQ by CEA for TPPs commissioned as on 31.03.2009, for total quantity of 306 Million Tonne. Subsequently, CIL has signed FSAs for a linked capacity of 71,145 MW out of aggregate capacity of 78000 MW under the Presidential Directives for TPPs commissioned/likely to be commissioned between April 2009 and March 2015. In addition to that, CIL is having pending LoAs of about 30,800 MW having coal requirement of about 116 Million Tonne of coal out of which power plants of about 19,300 MW capacity having coal requirement of about 73.5 Million Tonne have achieved milestones. CIL has also stated that considering huge negative coal balance existing at CIL, it would not be in a position to provide any additional coal linkage in respect of any additional power plants.

Recently MoP and Kanti Bijlee Utpadan Nigam Ltd has also requested for enhancement of FSA quantity from 0.5 MMTPA to 1.3 MMTPA for Muzaffarpur Thermal Power Station, Stage-I (2x110 MW) in view of the decision of the SLC (LT) dated 13.09.2013. It has now been stated that the plant is to reopen after R&M in February-March 2014 and actual coal requirement would be around 13 Lakh MT, whereas the present coal supply is at 5 Lakh MT.

SLC (LT) recommended the enhancement of coal supply to these plants keeping in view the special circumstances as explained in the minutes quoted above. SLC (LT) may take a view in the matter in the light of CIL's comments.

<p><b>Agenda No. 3- Mis. Items</b> (v) Request for enhancement of linkage quantity of NTPC's North Karanpura Power Project.</p>	<p>The coal linkage granted earlier to NTPC's North Karanpura Power Project was cancelled and subsequently restored on 09.05.2013 as per the directions of the Cabinet Committee on Investment (CCI). Pursuant to this the coal company (CCL) has issued LoA for the project for an ACQ of 7.039 MTPA of erstwhile E grade of coal. MoP has forwarded a letter from NTPC stating that the LoA quantity is less than the original linkage quantity of 10.24 MTPA. NTPC has already taken up the matter with the coal company and their response is awaited. Coal India has been advised to examine the matter and their comments. CCL has stated that the LoA quantity has been fixed at 90% or the normative quantity calculated in accordance with the MoP norms as calculated for other similarly placed consumers. SLC (LT) may take an appropriate view accordingly.</p>
<p><b>Agenda No. 3- Mis. Items</b> (vi) Request for the Name change of M/s. Coastal Paper Ltd.</p>	<p>Coastal Paper Limited, Kadiyam Andhra Pradesh was granted linkage in 1998 for its paper unit. The company was taken over by Andhra Paper Mills Ltd. headquartered at Rajahmundry. The takeover was done on the basis of the order passed by the High Court of Andhra Pradesh. Subsequent to the takeover, the paper unit was named as APPML, Unit Coastal Paper. Subsequently in 2011 APPML was taken over by International Paper, US by acquiring majority shareholding in APPML through FDI route. Thereafter the 2 units have been renamed as APPML Kadiyam and APPML Rajahmundry. It has now been requested for change of name of the company accordingly and transfer of the linkages for the 2 units.</p>
<p><b>Agenda No. 4- Review of pending LoAs issued for Power Sectors (IPP)</b></p>	<p>177 LoAs were issued by the CIL and its subsidiaries for power projects to be commissioned during the 11<sup>th</sup> &amp; 12<sup>th</sup> Plan. (Some of these LoAs cover in parts, different units to be set up by the same developer. In such cases some parts have been covered within the Presidential Directive (PD) issued on 17.07.2013. FSAs have been signed for such parts of LoAs and the remaining parts are pending. Therefore the Number of LoAs and FSAs may not tally). These LoAs cover a capacity of about 1,08,000 MW. Projects with capacity of 78,000 MW have been approved for Coal supplies by the CCEA and covered in the PD. For these projects FSAs were to be signed for 172 units covering 134 LoAs. 157 FSAs have been signed so far. In the</p>

remaining 15 cases some issues related to change of ownership, extension of coal supplies beyond the period admissible under Tapering Linkage Policy, etc are involved. Such issues are being considered separately. Therefore, these 15 cases covered within the PD are not being listed for review by the Committee except the project listed at Agenda No. 3 (i).

The remaining 43 LoAs are not covered within the 78,000 MW projects. Out of this, 22 projects have already achieved their milestones as reported by CIL and 7 LoAs have been cancelled. Therefore these projects are also not being listed for review by the Committee. The remaining 14 pending cases may be reviewed by the Committee. Their status of achievement of milestones as indicated by the coal companies is indicated against each item in the statement given below as Agenda Item No. 4 (i) to (xiv).

New Delhi, dated the 18 December, 2013

**Agenda for the meeting of the Standing Linkage Committee (Long-Term)**  
**for Sponge Iron to be held on 20<sup>th</sup> December, 2013**

A meeting of the Standing Linkage Committee (Long Term) for Sponge Iron will be held on 20.12.2013 under the chairmanship of Additional Secretary (Coal) to review the status of LoAs issued by Coal India Ltd. and its subsidiaries in pursuance of the recommendations of the Committee.

<b>Agenda Item &amp; No.</b>	<b>Brief Description of the Agenda item</b>
<b>Agenda Item No.1: Issue regarding acceptance of fresh applications seeking LoAs in Sponge Iron Sector</b>	<p>Meeting of the Standing Linkage Committee (Long-Term) for Sponge Iron was last held on 6.11.2007. It was not held thereafter due to the negative coal balance being reported by the CIL and its subsidiaries. Therefore no fresh linkages were considered. No review meeting was also held to ascertain the status of linkages already granted.</p> <p>In the meanwhile applications for fresh linkages were being received in the Ministry for upcoming projects. At present 391 applications are pending in the ministry for the grant of Letters of Assurance in Sponge Iron sector.</p> <p>In view of the existing LoAs and negative coal balance reported by subsidiary coal companies of CIL, a decision was taken by SLC (LT) in respect of power sector in its meeting held on 31.05.2013 viz. receipt of fresh applications for LoAs from power sector be kept in abeyance for a period of two years. Thereafter matter would be reviewed. As regards unprocessed applications, it was recommended that the fees deposited by them be deposited to the Govt. account but the processing of these applications should be kept</p>

in abeyance. Whenever it would be decided to accept fresh applications for LoAs, such unprocessed applications would get precedence over fresh applications to be received.

As the supply position is not likely to improve in the near future, it is proposed that a similar decision as taken for the power sector by SLC(LT) for power on 31.05.2013 may be taken for Sponge Iron sector also, so that receipt of fresh applications may be stopped.

**Agenda No. 2-  
Review of pending
